

# ***EVOLVE EXCLUSIVE E10***

Your path to increased merchandise availability  
with the Dual RF-RFID E10

ELECTRONIC ARTICLE SURVEILLANCE ANTENNAS

# EVOLVE EXCLUSIVE E10

Leverage the same tag for inventory management and loss prevention as you transition to RFID

The **EVOLVE EXCLUSIVE E10 RF-RFID Antenna** is the perfect solution for retailers that want a smooth, cost-effective transition to RFID, enabling them to leverage their existing RF tags and tagging process, and gradually transition to RFID-based EAS as they increase RFID tagging of merchandise for inventory management. In this way, retailers protect all of their merchandise, and gradually increase their RFID adoption, obtaining the dual benefits of a single RFID tag for both inventory management and loss prevention.

The E10 Antenna leverages Checkpoint's patented Wirama Radar™, which reduces false alarms and improves merchandising flexibility and the use of space near the store entrance. And the E10 accomplishes all of this while looking great too, thanks to its high-quality, customizable and easily interchanged fabric panels, which can reflect your store's ambiance or display seasonal promotional messages. Each E10 pedestal enhances your store's inventory management, loss prevention and aesthetic needs.

- ✓ **COMBINED TECHNOLOGIES**  
unique RF-EAS, and RFID-based EAS for the flexible adoption of RFID for both inventory management and enhanced loss prevention over time, while leveraging existing RF tags and processes
- ✓ **HIGH-QUALITY GRAPHIC PANELS WITH YOUR CHOICE OF DESIGN**  
available directly from Checkpoint, easily applied/interchanged; customizable graphics and messaging; ensures a sleek, streamlined design to complement store aesthetics
- ✓ **WIRAMA RADAR™ CAPABILITY\***  
reduces false alarms; increases flexibility of merchandise display positioning and use of valuable space
- ✓ **DIFFERENTIATED ALARMS\***  
identifies high value and high volume theft events, enabling store associates to respond appropriately
- ✓ **IDENTIFIES UNIQUE EPC NUMBERS\***  
identifies specific items that were stolen, enabling retailers to reduce out-of-stocks by replenishing merchandise that should be on-shelf and preventing stolen merchandise being returned to store

Easily interchangeable graphic panels
